Room-inate

Pretend you are designing a room in the Designer Showhouse. What type of room would you design? What would the floors look like? What color would you paint the walls?

Complete your answers in the spaces below.

I would design a _____

(Bedroom) (Bathroom) (Foyer) (Porch) (Great Room) (Dining Room) (Kitchen)

(Laundry Room) (Landing) (Glamping Tent)

I would paint the walls _____

The floors would be _____

One special thing I would add is _____

For the windows I would _____

I want my light fixtures to _____

When people are in my room they will feel _____

I will use cabinets that are _____

My countertops will be _____

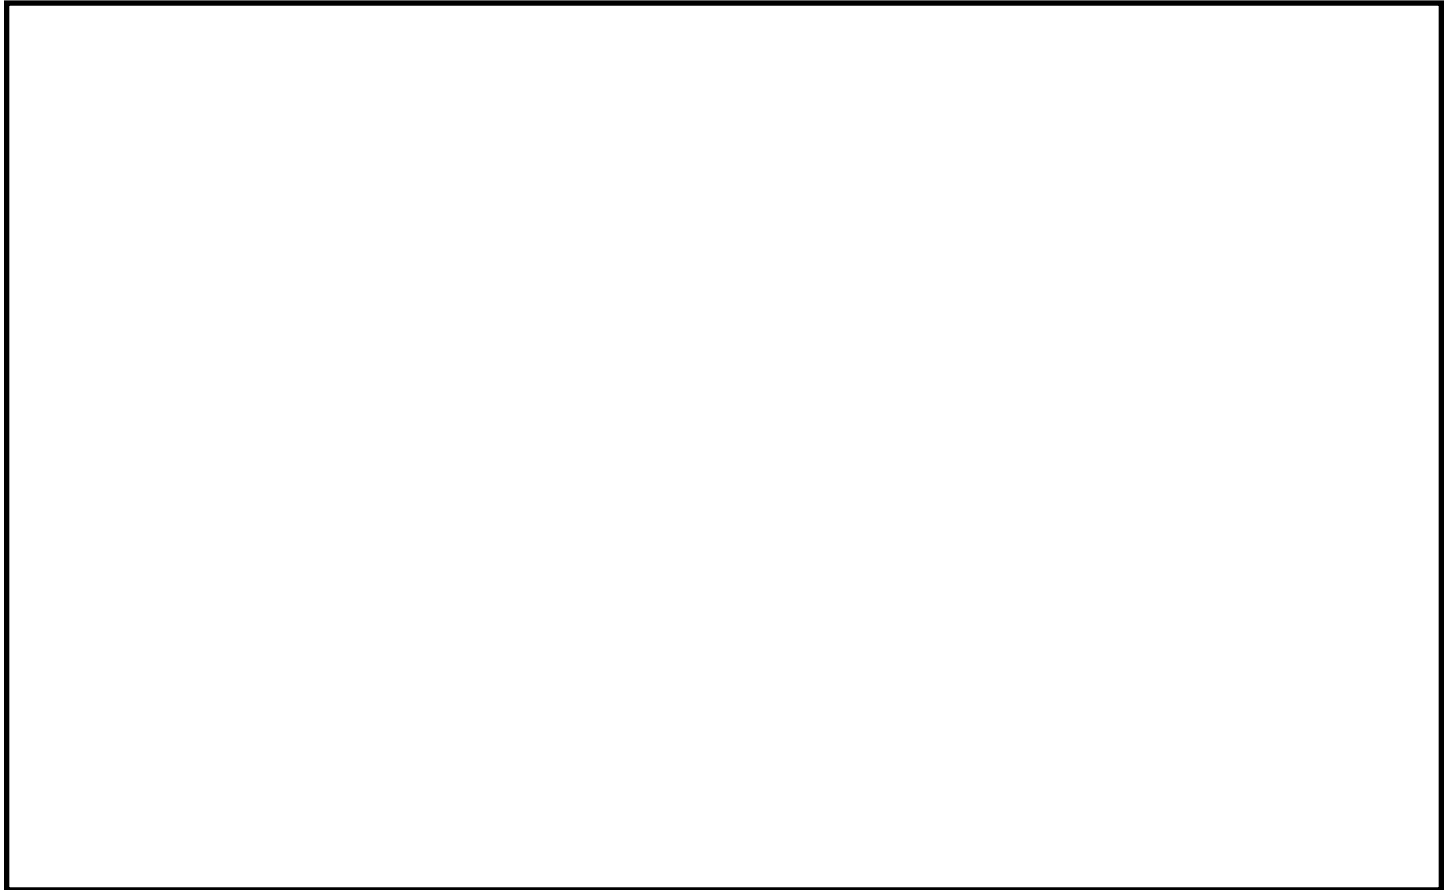

Design A Mood Board

Artists use mood boards in various creative fields, like interior design, fashion and graphic design. A mood board is a physical or digital collage of images that communicate nonverbal ideas in visual terms. Mood boards can include art, architecture, nature, furniture, products, paints, materials and more. Below are examples of mood boards from two of the designers in the 2020 Designer Showhouse. Use the space below to create your own mood board for your room.

Grid Lock

Research the items on your mood board, about how big would the furniture be? Pretend each square below equals one foot. Draw major items in your room based on the space provided below using proper scale. For instance, if you are drawing a 10 foot rug, you would use 10 squares.
